DESIGN YOUR SURVEY

POWERFUL DESIGNER

Using just your Web browser, you can create your survey with our intuitive survey designer. Select from several types of questions: multiple choice, short answer, essay, choose one, choose all that apply, rating scales, drop-down menus, and more. Powerful options enable you to require answers to any question, create sub-questions, allow anonymous responses, and preview your surveys before publishing.

CREATE RE-USABLE CONTENT

Create a library of content and questionnaires, which you may track and organize for easy retrieval and re-use. Plus, you can build a new survey based on questions from a previously created survey.

COMPLETE CREATIVE CONTROL

You can change the colors and the font size and style of any element in your survey. Upload your own logo and save custom themes to use on all of your surveys.

COLLECT RESPONSES

TARGET YOUR AUDIENCE

You can send a survey invitation to your own email list using our simple list management tool or survey specific groups with campus roles.

PICK YOUR COLLECTION METHOD

Send your survey via email or post it to the dashboards of your target audience with a CampusCruiser Dashboard Pop-in—or both. You can stop response collection automatically based on date and time.

“The integration with the CampusCruiser portal is the #1 feature of this Survey Tool. It is very easy to target audiences through the portal’s secure Role Assignment functionality.”

Scott Weigand, Technology Director, Western International University

“We can be confident each user is only completing the survey once while still returning anonymous results because the Survey Tool ensures validity of our data through secure user authentication.”

Matthew Smith, Research Coordinator, Pitt Community College
