

## China's CRTVU-Online/Open EDU and Timecruiser® Partner in Online Training

July 14, 2009 (Fairfield, NJ) - [Timecruiser Computing Corporation](#) (TCC), a trusted [software as a service \(SaaS\)](#) partner to the U.S. higher education community since 1999, today announced that China's National Center for Open & Distance Education ("Open EDU"), also known as CRTVU-Online (Educational Technology Limited) has selected [CampusCruiser](#)® portal and [CourseCruiser](#)™ Learning Management System from Timecruiser's on-demand enterprise e-learning suite to manage its online professional certification and continuing education services in China.

"CampusCruiser was selected for its highly configurable e-learning platform and integral virtual learning community capabilities," according to Simon Zhao, managing director of Open EDU/ CRTVU-Online. "We examined educational portal and LMS solutions in the U.S., Europe and Japan, and concluded that CampusCruiser and CourseCruiser are the best fit for our non-degree education business, along with integrating well with our backend administrative systems. The technical benefits of [SaaS](#) will serve our growth in non-degree education well into the future."

The implementation of CourseCruiser and CampusCruiser provides Open EDU/CRTVU-Online with a centrally managed [on-demand solution](#) that can facilitate multiple and independent training programs simultaneously. Open EDU is China's largest distance education service network, with over 1,400 learning centers located nationwide in China. Through this widespread educational services network, Open EDU fulfills the needs of China's large scale training programs targeted at adult learners.

"Timecruiser's on-demand technology matches well with the service network of Open EDU/CRTVU-Online." said Allen Wang, president of Timecruiser. "This partnership offers training enterprises in China a unique platform solution to extend their training missions across the country effectively. We are pleased to be the chosen partner for Open EDU to serve the Chinese training market."
