

 **BUILT-IN ACCESS TO YOUR
LIBRARY'S ELECTRONIC RESOURCES**

Colleges face several challenges as they strive to give everyone consistent access to all their licensed library resources from any location:

Remote access: Typically, licensed electronic resources come with restrictions that limit one-click access to computers and devices on the institution's network. Students studying abroad and distance learning students taking classes from their homes in remote locations must complete a separate authentication process to access library resources.

Multiple logins: Each Web-based library resource, and database comes with its own login and password, making online research more time consuming than necessary.

Help Desk Overload: Multiple passwords created... multiple passwords lost; leading to help desk burnout.

When Timecruiser integrates with your EZproxy installation, clicking into a library database will be just as easy and secure as clicking into an email because the library resources are fully visible and accessible right from your CampusCruiser™ portal.

KEY BENEFITS:

1. Single sign-on authentication for local and remote users improves access, reduces frustration, and saves time.
2. Users access the Web-based library resources within the application they're already using for all other administrative and learning resources.
3. Helps libraries with limited IT resources deliver a quality eContent experience for remote users.

"I have three campuses, so having the EZproxy integration through my CampusCruiser portal makes all our library services available to ALL our users no matter where they are – on one of our campuses, at home, or at their local coffee shop."

Mr. Agustin Alejandro, Southwest Texas Junior College

EZproxy, by OCLC Online Computer Library Center, permits libraries' electronic resource subscriptions to be accessed from any internet-connected device – on-campus or remote. From within the campus network, users have one-click access. Remote users must successfully complete an authentication process.

Securely connect your CampusCruiser portal to your licensed content providers such as: LexisNexis, JSTOR, Gale InfoTrac, Atomic Learning, Columbia Earthscape, and more.

Here's how we do it. Your CampusCruiser® portal already gives your students and faculty secure, one-click instant access to multiple administrative and academic applications:

- Academic calendars
- Email
- Blogs
- Campus announcements
- Classes
- Communities
- CourseCruiser™
- CruiserAlert™
- CruiserEval™
- Your SIS
- Other campus applications

Now, you can take it one step further.

Give your students – no matter where they are – secure access to all your library's electronic subscription resources through your CampusCruiser portal.

Experience the CampusCruiser EZproxy integration hands-on.
